Education

Vellore Institute Of Technology **2023 – 2027**
B.Tech in Computer Science *CGPA: 8.32*

Dr. Ambedkar College, Nagpur **2021 – 2023**
Higher Secondary (12th Grade)

Montfort Sr. Sec. School, Nagpur **2020 – 2021**
10th Grade

Technical Skills

Programming Languages: C++, Java, JavaScript, Python, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST API Development
Databases: MongoDB, MySQL
Cloud Computing: AWS EC2, AWS S3, AWS Lambda, API Gateway, DynamoDB
Tools: Git, GitHub, Postman, VS Code
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

Projects

Movie Booking Website | *MERN Stack* | **Live Demo** | **GitHub** **2026**

- Built and deployed a full-stack movie booking platform using React.js, Node.js, Express.js, and MongoDB on Vercel.
- Implemented secure authentication and role-based functionality using Clerk for users and administrators.
- Integrated Stripe for online payments and developed REST APIs for movies, bookings, users, and payment workflows.
- Automated booking confirmation and background workflows using Inngest.
- Designed a responsive UI for browsing movies, selecting showtimes, booking seats, and managing bookings.

Weather App | *React.js, Weather API, AI* | **GitHub** **2026**

- Built a weather application using React.js that fetches real-time weather information from a weather API.
- Created dynamic weather cards displaying temperature, humidity, wind speed, weather conditions, and other details.
- Integrated AI-based weather insights to provide simple and useful information about current weather conditions.
- Designed a responsive interface for searching and viewing weather information for different cities.

SyncDoc | *React.js, Node.js, Express.js, MongoDB, Yjs* | **GitHub** **2026**

- Built a collaborative structured-document editor using React.js, Node.js, Express.js, and MongoDB with support for headings, paragraphs, code blocks, and lists.
- Implemented real-time collaborative editing using Yjs (CRDTs) and WebSockets to synchronize document changes between users.
- Developed REST APIs for document creation, retrieval, and updates, with MongoDB persistence for document data and structured AST snapshots.

Razorpay Clone | *React.js, Tailwind CSS* | **GitHub** **2025**

- Recreated the Razorpay landing page using React.js and Tailwind CSS with a focus on responsive design.
- Built reusable components for navigation, feature sections, payment solutions, and other sections.
- Implemented responsive layouts for desktop, tablet, and mobile screen sizes.

Certifications

The Bits and Bytes of Computer Networking — Coursera
Cloud Computing and Distributed Systems — NPTEL
Networking & Web Technology — Infosys Springboard
C++ Programming — Simplilearn
